RE: Proposed Resampling Effort for Sites 11 and 13  
in Response to RIDEM 19 December 1997 Comments  
NCBC Davisville, Rhode Island  
Submitted 2 January 1998, Dated 2 January 1998

Dear Mr. Otis;

The Rhode Island Department of Environmental Management, Office of Waste Management (RIDEM) has reviewed the above referenced document and concurs with the proposed resampling of the affected wells at Sites 11 and 13 utilizing the previously approved work plan for low flow sampling with a detection limit of approximately 1.5 ppb for antimony. In an effort to minimize delays to the FFA schedule sampling should take place as quickly as possible.

If you have any questions or require additional information please call me at (401) 277-3872 ext. 7138.

Sincerely,

Richard Gottlieb, P.E.  
Principal Sanitary Engineer
